**WHALE WATCHING IN PORT STEPHENS**

It is probably the ultimate wildlife experience to witness the 15m and 48 tonne bulk of the humpback whale as it propels itself skyward with powerful thrusts of its tail and crashes back into the ocean. Approximately 3,500 humpback whales migrate north to the tropics from late May to July and return to the Antarctic in September to November. Because the islands and headlands off Port Stephens extend so far east, the whales come in very close to the mainland on this 5,000 km migration.

*Blu Waters Luxury Accommodation*

**DOLPHINS**

Port Stephens is known as the 'Dolphin Capital of Australia'. Approximately 180 Bottlenose dolphins reside permanently in the waters of Port Stephens and can be seen at any time of the year. They are probably the most intelligent and best-loved creature in the sea. These dolphins often take great delight in riding the bow waves of any passing boat.
